DESCRIPTION

The X5200 UVIR Flame Detector meets the most stringent requirements worldwide with advanced detection capabilities and immunity to extraneous sources, combined with a superior mechanical design. The mounting arrangement allows the UV and IR sensors to monitor the same hazardous location with a 90 degree cone of vision. When both sensors simultaneously detect the presence of a flame, an alarm signal is generated. The detector has Division and Zone explosion-proof ratings and is suitable for use in indoor and outdoor applications.

The standard output configuration includes fire, fault and auxiliary relays. An optional 0 to 20 mA output with HART can be provided in addition to the three relays. A model with pulse output is available for easy retrofitting into existing Det-Tronics controller based systems. Auxiliary relay and 0 to 20 mA output are not available with the pulse model. A tri-color LED on the detector faceplate indicates normal condition and notifies personnel of fire alarm or fault conditions.

The X5200M UV/IR detector utilizes a molybdenum (moly) UV sensing element. Moly-based UV sensors have an increased spectral range of 1850 to 2650 angstroms, which is better suited for detecting substances with unusual chemistry and some black powders.

The X5200 housing is available in aluminum or stainless steel, with NEMA 4X and IP66/IP67 rating.

Typical applications include:
— Munitions
— Petrochemical applications
— Turbines
— Hangars

HIGHLIGHTS

- Complies with FM 3260
- EN54 certified
- Certified SIL 2 capable
- ATEX Directive compliant
- EQP models available
- A new level of false alarm rejection
- Responds to a fire in the presence of modulated blackbody radiation (i.e. heaters, ovens, turbines) without false alarm
- HART models available
- FDT/DTM capable
- High speed capability
- Microprocessor controlled heated optics for increased resistance to moisture and ice
- Automatic, manual or magnetic oj® (optical integrity) testing — no external test lamp required
- Easily replaceable oj plate
- Fire, fault and auxiliary relays standard
- MODBUS RS-485 communication
- 0 to 20 mA isolated output (optional)
- Pulse output for compatibility with controller based systems (optional)
- A tri-color LED on the detector faceplate indicates normal condition and notifies personnel of fire alarm or fault conditions
- Mounting arm allows easy sighting
- Integral wiring compartment for ease of installation
- Class A wiring per NFPA-72
- Meets NFPA-33 response requirement for under 0.5 second (available when model selected)
- RFI and EMC Directive compliant
- Built-in data logging / event monitoring

The UVIR Flame Detector X5200/X5200M/X5200G complies with FM 3260, EN54 certified, Certified SIL 2 capable, ATEX Directive compliant, EQP models available, a new level of false alarm rejection, responds to a fire in the presence of modulated blackbody radiation (i.e. heaters, ovens, turbines) without false alarm, HART models available, FDT/DTM capable, high speed capability, microprocessor controlled heated optics for increased resistance to moisture and ice, automatic, manual or magnetic oj® (optical integrity) testing — no external test lamp required, easily replaceable oj plate, fire, fault and auxiliary relays standard, MODBUS RS-485 communication, 0 to 20 mA isolated output (optional), pulse output for compatibility with controller based systems (optional), a tri-color LED on the detector faceplate indicates normal condition and notifies personnel of fire alarm or fault conditions, mounting arm allows easy sighting, integral wiring compartment for ease of installation, class A wiring per NFPA-72, meets NFPA-33 response requirement for under 0.5 second (available when model selected), RFI and EMC Directive compliant, built-in data logging / event monitoring.
### Specifications

**Operating Voltage**
24 Vdc. Operating range is 18 to 30 Vdc. Maximum ripple is 2 volts peak-to-peak.

**Power Consumption**
2.8 watts @ 24 Vdc minimum. 175 watts @ 30 Vdc with EOL resistor installed and heater on maximum.

**Relays**
Contacts rated 5 amperes at 30 Vdc.
- **Fire Alarm:** Form C (NO and NC contacts) — normally de-energized
  - Latching/non-latching.
- **Fault:** Form A (NO contacts) — normally energized
  - Latching/non-latching.
- **Auxiliary**:
  - Form C (NO and NC contacts) — normally energized
  - Latching/non-latching.

**Current Output**
0–20 mA (± 0.3 mA), with a maximum loop resistance of 500 ohms from 18–19.9 Vdc, 600 ohms from 20–30 Vdc.

**Temperature Range**
- **Operating:** -40°F to +167°F (-40°C to +75°C)
- **Storage:** -67°F to +185°F (-55°C to +85°C)

**Humidity Range**
0 to 95% relative humidity, can withstand 100% condensing humidity for short periods of time.

**Spectral Sensitivity Range**
All X5200 IR wavelength range 4-5 microns. X5200/X5200G UV wavelength range 185-265 nanometers. X5200M UV wavelength range 185-245 nanometers.

**Field of View**
The detector has a 90 degree cone of vision (horizontal) with the highest sensitivity lying along its central axis.

**Source Tube**
Contains radioactive isotope Krypton 85 (Kr85). Calculated Activity: 14,800 Becquerels (0.4μCi).

**Warranty**
3 years.

**Enclosure Material**
Copper-free aluminum (painted) or stainless steel (316/CF8M Cast).

**Conduit Entry Size**
3/4 inch NPT or M25.

**Shipping Weight**
Aluminum: 7 lbs. (3.2 kg)
Stainless Steel: 14.6 lbs. (6.7 kg).

**Wiring**
16 AWG or 2.5 mm² shielded cable is recommended.

**Certification**
- **Class I, Div. 1, Groups B, C & D (T5);**
- **Class II, Div 1, Groups E, F & G (T5);**
- **Class I, Div. 2, Groups A, B, C & D (T3);**
- **Class II, Div. 2, Groups F & G (T3);**
- **Class III.**

**Reference Manual**
X5200 Safety Manual (95-8672).

**FM Type Approval**
X5200 is FM Approved.

**ATEX Certificate of Conformity**
