The FlexSight™ Line-of-Sight Infrared Hydrocarbon Gas Detector model LS2000 is a gas detection system that provides continuous monitoring of combustible hydrocarbon gas concentrations in the range of 0–5 LFL-meters, over a distance of 5–120 meters. Standard system outputs include an electrically isolated/non-isolated 4-20 mA DC current output, with HART communication and RS-485 Modbus communication. Alarm and fault relays are available as an option.

The system consists of two stainless steel modules — a transmitter and a receiver, along with mounting fixture hardware. Both modules are powered from an external 24 volt DC supply. The receiver provides the measurement signal outputs, and is furnished with onboard “status indication” LEDs and an internal magnetic calibration switch. The transmitter houses a high quality xenon flash lamp.

The LS2000 is certified explosion-proof for use in Class I, Division 1 and 2; Class II, Division 1; Class I, Zone 1; and Zone 1, Zone 2 hazardous areas and holds third party performance certification for methane, butane, and propane gas detection. It can be used as a stand-alone detector, or as part of a larger facility protection system using other Det-Tronics equipment.

By connecting the transmitter and receiver via a three-wire shielded cable, an optional “communication link” can be created between the two devices to enable: single point system diagnostics, dynamic lamp power optimization, synchronized LEDs, transmitter configuration via connection to the receiver, and calibration initiation from either device.

*Per regulatory approval requirements, the unit power consumption was measured at 33 VDC input voltage (10% above claimed range) and results listed on the product label.

- **Inrush Current**: 1 amp typical inrush current at 24 Vdc.
- **Transmitter Lamp**: Xenon flashlamp, field-replaceable module.
- **Warmup Time**: 15 seconds minimum, 150 seconds maximum from power-up, depending upon alignment accuracy.
- **Current Output**: Linear 0-20 mA (isolated/non-isolated) rated to 600 ohms maximum loop resistance @ 24 Vdc operating voltage. Levels below 4 mA indicate a fault condition. Fault output levels are user selectable.
- **Relay Outputs (Optional)**: Available on Ex d approved models. Two alarm output relay, Form C Type (NO/NC). Contact Rating: 3 amperes at 30 Vdc.
- **Alarm Relay Setpoint Range**: Low Alarm: 0.5 to 4.5 LFL-meters (default = 1)
- **Visual Status Indicator**: Multi-color LED on each module indicates operating status.
- **Available Gases**: Third party performance approved to methane, butane, and propane.
- **Detection Range**: Short Range: 5-60 meters. Long Range: 30-120 meters.
- **Misalignment Tolerance**: ±0.8 degree minimum (±56cm @ 40m; ±168cm @ 120m).
- **Calibration**: LS2000 systems are span calibrated for methane, butane, or propane at the factory. Span calibration in the field is not required. Zero calibration can be accomplished in the field using the on-board magnetic reed switch.
- **Response Time**: T90: 2 seconds (5.0 LFL-meters applied).
- **Accuracy/Linearity**: ±5% of full scale gas concentration or ±10% of applied gas concentration, whichever is greater.
- **Repeatability**: ±5%.
- **Humidity**: 95% relative humidity; designed for outdoor applications.
- **Fog Performance**: FM 6325 performance req. 6.5.
- **Vibration**: FM6325 and DIN Standard for Cert No. 2.4, Type B (DNV testing includes operation of alignment mounts during 4G vibration).
- **Measurement Range**: 0-5 LFL-meters.
- **Interference Resistance**: Immune to sun and flare radiation, tested to 800 ±30 W/m² at ≥ 3° to optical axis and common contaminants.
- **Self-Diagnostic Test**: Fail-Safe operation ensured by performing all critical tests once per second.
- **Module Housing Material**: 316 stainless steel (CF8M).
- **Conduit Entry Options**: 3/4 inch NPT or M25, with two entries for transmitter and four entries for receiver.
- **Optics Protection**: Microprocessor controlled heated optics mitigate against ice and dew formation.
- **Ingress Protection**: IP66/7; NEMA Type 4X
- **Tropicalization / PCBD Protection**: Conformal coated printed circuit boards: CTI Rating of 600V, maximum allowed by standard. Third party tested per ASTM-D-3638-07.

### Wiring
- Field wiring screw terminals are UL/CSA rated for up to 14 AWG shielded wire, and are DIN/VDE rated for 2.5 mm² wire.

### Shipping Weight
- Transmitter and receiver with mounting hardware: 85 pounds (38 kg).

### Warranty
- 5 year limited warranty from date of manufacture.
- 10 year warranty on IR source.

### Certification
- **Receiver with or without Relays**
  - Class I, Div. 1, Groups B, C & D (T4).
  - Class II/Ill, Div. 1 & 2, Groups E, F, G & T (T4).
  - Class II/Ill, Div. 1, Groups E, F & G (T4).
  - Class II/Ill, Div. 2, Groups F, G & T (T4).
  - Tabb = –50°C to +65°C.
  - Class I, Zone 1, AEx db eb IIC T4 IP66/67.
  - **Receiver without Relays**
    - Class I, Div. 1, Groups B, C & D (T4).
    - Class I, Div. 2, Groups A, B, C & D (T3C).
    - Class II/Ill, Div. 1, Groups E, F, G & T (T4).
    - Class II/Ill, Div. 2, Groups E, F & G (T3C).
    - Tabb = –50°C to +75°C.
    - Class I, Zone 1, AEx db eb IIC T4 IP66/67.
