The FlexVu® Model UD10 is recommended for applications that require a gas detector with digital readout of detected gas levels as well as analog 4–20 mA output with HART, relay contacts, and Modbus RS485. The UD10 is designed for use with Det-Tronics gas detectors such as GT3000, PIR9400, PIECL, PIECL CO₂, OPECL, C705x*, Model 505/CGS, CGS**, NTMOS, ATX100/AV10, PIRDUCT, or LS2000, as well as generic linear 4–20 mA sensors. The display unit is designed and approved as a “stand alone” device and performs all the functions of a gas controller.

Gas concentration and unit of measurement are indicated on a digital display. The display unit provides a linear isolated/non-isolated 4–20 mA DC output signal (with HART) that corresponds to the detected gas concentration.

All electronics are enclosed in an explosion-proof aluminum or stainless steel housing. The display unit is used with a single detector that may be either coupled directly to the UD10, or remotely located using a sensor termination box. The UD10 features non-intrusive calibration. A magnet is used to perform calibration as well as to navigate the UD10’s internal menu.

The UD10 can be used with various 4–20 mA gas detection devices, with or without HART. The unit provides display, output, and control capabilities for the gas detector.

The UD10 utilizes the following I/O:
- **Signal Inputs:** 4–20 mA loop from the sensing device
- **User Inputs:** Magnetic switches (4) on the display panel
  HART communication
- **Signal Outputs:** 4–20 mA output loop with HART
  Modbus RS485
  Three alarm relays and one fault relay
- **Visible Outputs:** Backlit LCD display
  HART slave interface via HART Communicator

### FEATURES AND BENEFITS

- Universal design supports multiple Det-Tronics sensors or generic linear 4–20 mA sensors
- Local digital LCD display continuously indicates gas level, gas type, and units measured
- Backlit and heated display
- Non-intrusive calibration quickly performed by one person
- Rugged construction approved for use in classified hazardous areas
- Linear isolated/non-isolated 4–20 mA output with HART
- Non-intrusive menu allows device configuration without de-classifying the hazardous area
- Internal magnetic switches provide a non-intrusive user interface
- Smart capabilities with access to sensor information and measurement range
- Event logs: Calibration with date and time stamp
- Fault logs: Detector fault, Low power, and General fault
- Alarm logs: High gas alarm, Low gas alarm, and Aux alarm
- SIL2 models certified to IEC61508 by exida®

**C7065E O₂ detector is not supported.**

**Requires the use of a CGS Interface Board. See Instruction Manual 95-8661 for details.**
Operating Voltage
24 Vdc nominal, operating range is 18 to 30 Vdc.

Operating Power
Standard model, with heater and backlight off:
No alarm: 1.5 watts @ 24 Vdc.
Alarm: 3 watts @ 24 Vdc (20 mA current output and all 3 alarm relays energized).
Backlight on: 0.5 watt additional.
Heater on: 3.5 watts additional.
CGS model: Add 4 watts with CGS interface board and CGS sensor installed.
Maximum power in alarm, with heater and backlight on:
7 watts @ 30 Vdc (Standard model)
11 watts @ 30 Vdc (CGS model)

NOTES:
- Heater turns on when the internal temperature drops below –10°C. Heater function can be disabled to save power.
- Appropriate relays will be activated when a fault or alarm occurs.

Current Output
Linear isolated 4–20 mA output with HART.
Maximum loop resistance 600 ohms at 18 to 30 Vdc.

Relay Contacts
Three Alarm Relays:
Form C, 5 amperes at 30 Vdc.
Selectable energized/de-energized.
Selectable latching/non-latching.

One Fault Relay:
Form C, 5 amperes at 30 Vdc.
Normally energized for no fault condition with power applied.

Operating Temperature
–55°C to +75°C.

Storage Temperature
–55°C to +75°C.

Humidity Range
5 to 95% RH (Det-Tronics verified).

Wiring Terminals
14 to 18 AWG, 2.5-0.75 mm² wire can be used.

Conduit Entries
3/4” NPT or M25.

Enclosure Material
Epoxy coated aluminum or 316 stainless steel.

Shipping Weight
Aluminum: 4.15 pounds (1.88 kilograms).
Stainless Steel: 10.5 pounds (4.76 kilograms).

Warranty
Find warranty information by clicking on the Terms and Conditions section of the Det-Tronics Resources page: https://www.det-tronics.com/resourcetypes

Electro-Magnetic Compatibility
EMC Directive 2014/30/EU
EN 50270:2006
EN 61000-6-2:2005
EN 61000-6-4:2007

Refer to Instruction Manual 95-8661 for in-depth information regarding the FlexVu UD10 Universal Display Unit.

Certification
FM:
Class I, Div. 1, Groups B, C & D (T5);
Class I, Div. 2, Groups B, C & D (T4);
Class I, Zone 1/2 AEx d IIC (T5);
Class II/III, Div. 1/2, Groups E, F & G.
Tamb: –50°C to +75°C
NEMA Type 4X, IP66
Conduit seal not required.
Performance verified in accordance with:
ANSI/ISA-92.0.01:1998;
ANSI/ISA-92.00.01:2010;
ANSI/ISA 60079-29-1 (12.13.01)2013

CSA:
CSA 2029512.
